## INTRODUCCION

La producción animal de rumiantes ha ido adquiriendo cada vez mayor importancia en las áreas tropicales del mundo y las tendencias actuales en muchos países indican que la ganadería seguirá en aumento como consecuencia de la intensificación del uso de los recursos disponibles. Entre ellos, los pastos forman la base de la alimentación del ganado en la gran mayoría de estos países y una mejor utilización de estos recursos debe resultar en una mayor capacidad productiva.

Aunque el acopio de literatura de trabajos relacionados con la producción y utilización de pastos en zonas tropicales es bastante grande, no puede compararse a lo conocido en zonas templadas. Es por ello que se ha creído conveniente publicar la presente bibliografía en que además de incluir los trabajos en idioma inglés se ha dado especial énfasis a los trabajos en español que son numerosos y muchas veces desconocidos.

La bibliografía de pastos y forrajes para las zonas tropicales que se presenta a continuación se espera que sea de utilidad para profesores, investigadores y estudiantes en el área de la producción animal.

A fin de facilitar la comprensión se ha seguido el formato utilizado por el "Herbage Abstracts" que seguramente es familiar para los lectores de esta obra.

Tropical

## METODOLOGIA

Por recomendación emanada de la Reunión de Pastos y Forrajes Tropicales realizada en Bogotá en abril de 1971 se ha compilado la Bibliografía de Pastos y Forrajes Tropicales. Este trabajo es el resultado del esfuerzo cooperativo del Programa ROCAP/Zona Norte, el Departamento de Ganadería Tropical del IICA-CTEI y de IICA-CIDIA.

La publicación es de carácter mundial y reúne unas 6000 referencias bibliográficas sobre esta especialidad.

Para la presentación del material en esta publicación se ha adoptado, con ligeras modificaciones, el esquema utilizado por el Herbage Abstracts como puede observarse en la Tabla de Contenido.

Un índice de autores y otro de materias al final de la obra permiten una mejor utilización y localización de la información bibliográfica contenida en esta publicación.

Se registra información sobre diferentes tipos de publicaciones tales como: libros, folletos, tesis, artículos de revistas, trabajos presentados a reuniones nacionales e internacionales.

El alcance cronológico cubierto por la Bibliografía es el comprendido entre los años 1956-1971 inclusive.

Gran parte de los documentos registrados en la Bibliografía estarán accesibles al investigador a través de los Servicios de Reproducción de Documentos del Centro Interamericano de Documentación e Información Agrícola, IICA-CIDIA.

La Bibliografía está limitada a la literatura de pastos y forrajes producida en o sobre la zona comprendida entre el Trópico de Cáncer y el Trópico de Capricornio. Bajo este concepto se han tenido en cuenta países con parte de su territorio dentro de dicha zona tales como Australia, México, India.

La información bibliográfica se obtuvo básicamente en la consulta de las fuentes secundarias existentes en la Biblioteca del IICA-CIDIA (catálogos, índices, revistas de compendios, bibliografías nacionales, etc.).
