

# Using Climate Data to Increase Agriculture Yields

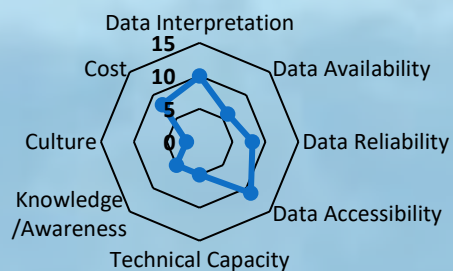

## Baseline Poll

How informed do you feel about using climate data in on-farm decision-making?

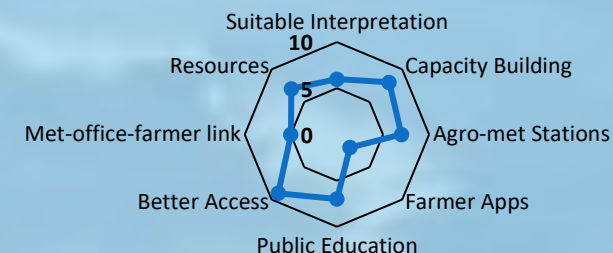

## Breakout Groups Dialogue

Barriers hindering the use of climate data in farm decision-making

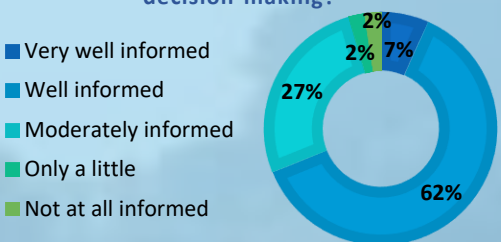

Actions that can be taken to address these barriers

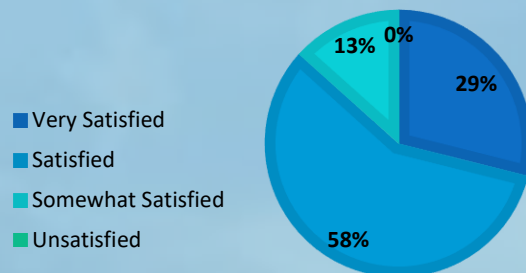

## Feedback Poll

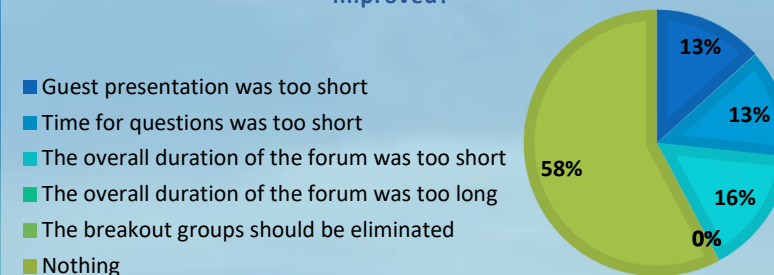

Do you feel better informed about using climate data in on-farm decision-making?

How satisfied were you with the forum?

What components of the training do you feel can be improved?

Guest Speaker: Dr. Antonio Joyette

Objective: To raise awareness of the key climate data and practices that can be used to guide on-farm decision-making to improve farm resilience and increase agriculture yields.
