CCRAF Agriperfiles Repository**

A Knowledge-to-Action Framework

Caribbean
Climate Responsive Agriculture
FORUM

That aims to:

1. **Raise awareness** and share knowledge of climate smart agricultural practices and options for the Caribbean region
2. **Build a community** of interested and engaged actors at the regional and national levels
3. **Promote enhanced coordination** and collaboration among stakeholders across the region
4. **Translate technical knowledge to practical action on the ground**

Making Climate Action Self-Financing Through Viable EbA/NbS Livelihood & Green Business

Join US

In celebration of World International Mother Earth Day (IMED), its time to discuss the real and relative costs of community-based green livelihoods and businesses as viable tools to drive, mainstream, and sustain nature-based and ecosystem-based adaptation and geoengineering solutions for climate action
